Overage Pricing

Applies only when monthly average minutes exceed your plan limit

Plan	Included minutes	Overage rate	Example
Enhanced	1,200 min/mo	**$0.025 / min**	200 extra min = $5.00 added to invoice
Premier	2,000 min/mo	**$0.025 / min**	200 extra min = $5.00 added to invoice

Overage is calculated on monthly averages — not individual busy nights. A high-volume Monday and a quiet Friday average out across the full month before any overage applies. Your usage data is always visible in the portal before your invoice is generated — no surprises.
